As a full-stack developer, I have a strong focus on .NET Core, React, and Vue.js technologies. I am experienced in designing and building web applications from scratch and possess a deep understanding of software development best practices. My proficiency in .NET Core enables me to create robust back-end solutions, while my expertise in React and Vue.js allows me to create dynamic user interfaces. I have experience working on front-end and back-end development tasks, and I am skilled in database design and development. I am dedicated to delivering high-quality software that meets my clients' needs and exceeds their expectations. Overall, my combination of technical expertise and dedication to quality makes me an ideal candidate for any full-stack development position.

WORK EXPERIENCE

Kosovo Electricity Distribution Company - KEDS
Software Engineer
Pristina, District of Pristina, Kosovo | April 2021 - February 2023
- Designed, developed, and modified 5+ software systems and custom components
- Developed code following common security practices and development design patterns
- Learned multiple threading, concurrency, design patterns, and their impacts on application concurrency.
- Tested software for bugs and operating speed, fixing bugs and documenting processes to increase efficiency by 18%

International Advisory, Products and Systems (i-APS)
.NET Developer
March 2021 - December 2021
- Developed survey application as part of a 5-person team.
